

Main Applications

Protect temperature sensors and bi-metallic thermometers by insulating them from their environment.

Key Features and Advantages

Selecting the appropriate materials for Thermowells can help to withstand against corrosives, high pressure, high temperature, mechanical shock & vibration. We provide expert technical assistance in helping you to choose from a wide range of Drilled Bar Stock or Flange Thermowells in various metallic materials to best meet your requirements. In addition, various Certifications may be arranged upon request including those for the Oil and Gas industries:

- Wake Frequency Calculation (PTC 19.3 – 1986)
- Dye Penetration (ASME IX)
- Hydrostatic Test (External/Internal, ASME B16.5)
- X-ray Inspections (Radiographic Inspection On Welding Area)
- PMI (Positive Material Identification)
- Heat Treatment (NACE MR 01-75, 2002)
- Material Certificate (3.1B)
